ContractWare® 8.0c is the only web-based application for commercial industry that offers a complete electronic life cycle solution for contract creation, collaboration, management and performance combining robust functionality, search capability and management reporting. ContractWare® includes an on-line document library of contract templates with standard, alternate and optional terms and conditions with explanatory guidance and advice on the use and risk of each. ContractWare® provides an unbeatable total cost of ownership and an immediate return on investment.

Why ContractWare® Enterprise Edition?

- **All key business data at your fingertips.** Your Executive Dashboard gives you both an enterprise-wide and personalized view of key business indicators and real-time report snapshots. You can also run standard reports or customize your own.
- **Powerful contract management features.** You'll be able to "real-time" create and customize documents on-line, and electronically route them to team members for review or approval and be able to manage changes and revisions for each document.
- **Complete view of your suppliers.** All of your quotation and contract data, including pricing history, will be available to your business units and procurement teams assisting them with product and service decisions and leveraging future spending and negotiations.
- **Highly customizable to fit your needs.** You can define custom information you want to track related to any product, service or supplier. You can standardize your contract templates, define new forms, terminology, reports and how the application looks or link it directly to your website.
- **Superior performance for an affordable price.** Built from the ground up for growing enterprises, ContractWare® offers affordable pricing, accelerated implementation and comprehensive support that yields unbeatable total cost of ownership and immediate return on investment.
